

# Family Sharing Guide

---

## Overview

---

Final Evolution Lab's Family Sharing lets you share your subscription with family members. Each person gets their own profile, progress tracking, and personalized experience.

## Subscription Tiers

---

| Plan       | Price        | Users | Savings                     |
|------------|--------------|-------|-----------------------------|
| Individual | \$6/week     | 1     | —                           |
| Family 2   | \$10/week    | 2     | \$2/week vs 2× Individual   |
| Family 5+  | \$19.99/week | 5-10  | \$10+/week vs 5× Individual |

All plans include:

- ✓ 17 Game Modes
- ✓ 23 Exercises
- ✓ Body Scanning
- ✓ Facial Animation
- ✓ Earn Shards
- ✓ Shard Store
- ✓ 72-hour free trial

## Getting Started

---

### Creating a Family

1. Subscribe to **Family 2** or **Family 5+** plan
2. Navigate to **Settings → Family Management**
3. Your family group is automatically created
4. You become the **Owner** with full control

### Inviting Members

#### Method 1: Invite Code

1. Go to **Family → Invite Member**
2. Click **Generate Code**
3. Share the code (format: `FEL-XXXX-XXXX` )
4. Member enters code during sign-up or in Settings
5. Code expires in 7 days

## Method 2: Email Invitation

1. Go to **Family → Invite Member**
2. Enter member's email address
3. Click **Send Email**
4. Member receives link with embedded invite code

## Accepting an Invitation

1. Open the app or sign up
2. Go to **Settings → Join Family**
3. Enter the invite code
4. Confirm to join

## Member Roles

| Role         | Permissions                                                    |
|--------------|----------------------------------------------------------------|
| <b>Owner</b> | Full control: manage plan, members, billing, parental controls |
| <b>Adult</b> | Full access to all features, can invite members                |
| <b>Child</b> | Restricted access based on parental controls                   |

- Members under 13 are automatically assigned the **Child** role
- Only Owner can change billing or disband the family

## Individual Profiles

Each family member gets:

- **Separate save data** — Progress doesn't overlap
- **Personal progress tracking** — Individual stats and records
- **Individual customization** — Own avatar, settings, preferences
- **Private achievements** — Personal milestones
- **Own Shard wallet** — Earn and spend independently
- **Body scan data** — Individual biomechanical profiles

## Parental Controls

### Available Controls

- ☒ **Content filtering** — Age-appropriate content
- ☒ **Play time limits** — Set daily hour limit (default: 2 hours)
- ☒ **Allowed play times** — Set hours (e.g., 8 AM - 9 PM)
- ☒ **Require purchase approval** — Parent must approve shard spending
- ☐ **Multiplayer restrictions** — Limit online interactions

### Setting Up Parental Controls

1. Go to **Family → Members → [Child Name]**

2. Click **Edit Settings**
3. Toggle controls as needed
4. Save changes

## Alerts

- Notification when child exceeds playtime
- Notification for purchase approval requests
- Weekly activity summary email

## Family Features

---

### Family Leaderboard

- Compare stats across family members
- Weekly points based on workouts, games, and achievements
- Rankings updated in real-time

### Family Challenges

- Weekly family-wide challenges
- Complete together for bonus shards
- Track family progress

### Co-op Game Modes

- Play together in supported game modes
- Shared workout sessions
- Family tournaments

## Managing Your Plan

---

### Upgrading

- Go to **Settings** → **Subscription** → **Upgrade**
- Select new tier
- Price difference prorated
- New member slots available immediately

### Downgrading

- Only possible if current member count  $\leq$  new tier max
- Remove extra members first if needed
- Takes effect at next billing cycle

### Removing Members

- Owner/Adults can remove members
- Members can leave voluntarily
- Owner cannot be removed (must disband family)

## UE5 Integration

---

### C++ Classes

| File                                 | Purpose                                     |
|--------------------------------------|---------------------------------------------|
| <code>FELFamilyManager.h/.cpp</code> | Family CRUD, invitations, parental controls |
| <code>FELSubscription.h</code>       | Updated with family tier constants          |

### Key Blueprint Functions

- `CreateFamily()` → Returns FamilyID
- `GenerateInviteCode()` → Returns invite code
- `AcceptInvite()` → Joins family
- `SetParentalControls()` → Configure child restrictions
- `GetFamilyLeaderboard()` → Sorted leaderboard data

### Events

- `OnFamilyCreated` — Family group created
- `OnMemberJoined` — New member added
- `OnMemberRemoved` — Member left/removed
- `OnTierChanged` — Subscription tier changed
