

Shard Economy Guide

Overview

Final Evolution Lab uses a dual-currency system called **Shards**. Earn them through gameplay and spend them in the Shard Store. No pay-to-win mechanics — everything is earnable for free.

Currency Types

Evolution Shards (Free Currency)

- Earned through gameplay, workouts, and challenges
- Primary currency for all purchases
- Free to earn — no real money required

Premium Shards (Optional Paid Currency)

- Purchased with real money
- Provides faster access to items
- No exclusive premium-only items
- 100% optional

Progression (100–500 shards)

- XP boosts
- Workout program unlocks
- Fast-track progression

Rarity & Pricing

Rarity	Evolution Shards	Time to Earn
Common	300–800	1–2 hours
Rare	1,000–2,000	3–5 hours
Epic	2,500–5,000	6–12 hours
Legendary	5,000–10,000	12–25 hours

Premium Shard Packages

Package	Price	Shards	Bonus
Starter	\$0.99	100	—
Value	\$4.99	600	20% bonus
Premium	\$9.99	1,300	30% bonus
Ultimate	\$19.99	3,000	50% bonus

Premium vs Free

- **All items** purchasable with Evolution Shards
- Premium Shards = faster access only
- **No pay-to-win** mechanics
- **Cosmetic focus** — no gameplay advantages

Transaction History

- All transactions logged with timestamps
- View history in **Settings** → **Shard Wallet** → **History**
- Up to 500 transactions stored
- Filter by type (earned/spent), source, and date

Economy Design Philosophy

1. **Earning should feel rewarding** — Every play session nets meaningful shards
2. **Spending should feel meaningful** — Items feel worth the investment
3. **No frustration gates** — Never blocked by currency
4. **Optional premium** — Paying speeds things up but isn't required
5. **Balanced inflation** — New items added regularly to maintain economy

UE5 Integration

C++ Classes

File	Purpose
<code>FELShardEconomy.h/.cpp</code>	Complete economy system: wallet, earning, spending, store
<code>FELShardRewardTypes.h</code>	Reward type definitions

Key Blueprint Functions

- `AwardShards()` → Give shards for any source
- `AwardGameReward()` → Calculate game-end rewards
- `AwardWorkoutReward()` → Calculate workout rewards
- `PurchaseItem()` → Buy from store
- `ClaimDailyLogin()` → Process daily login reward
- `GetStoreItems()` → Browse store by category
- `GetTransactionHistory()` → View past transactions

Events

- `OnShardsEarned` — Shards awarded
- `OnShardsSpent` — Shards spent
- `OnBalanceChanged` — Wallet balance updated
- `OnStoreItemPurchased` — Item bought
- `OnDailyLoginRewardClaimed` — Login reward collected
